

Taha Fersi

GAME DEVELOPER / SOFTWARE ENGINEER

Ben Arous, Tunisia · tictacf12@gmail.com · +216 22 499 853 · tictacf11.github.io/tahafersi-portfolio

WORK EXPERIENCE

Freelance MMO gameplay programmer

Oct 2024 – Present

Jutsu Online, via Upwork — Knight Arena, an MMORPG on the Atavism engine

- Gameplay programming on the Java server and the client, first Unity then Unreal Engine 5.
- Rebuilt the combat and damage model, from attack power to cooldowns.
- Designed a server-authoritative projectile and hitscan system with server-side hit verification.
- Built the prayer, gathering and item upgrade systems end to end.
- Extended Atavism's Angular/Electron content editor so designers could author them.

Game Developer

Feb 2023 – Jul 2024

Q3 Software Development Services

- Gameplay programming in Unity/C# on a 2D rogue-like action game.

Freelance software developer

Feb 2021 – Jan 2023

magicmind.me

- Game development in Unity for Web and Android platforms.
- Worked with Firebase database and SDK, GPU particle systems, Cinemachine, Zenject dependency injection, Atavism, and Unity UI.
- Developed an Atavism server plugin in Java and the C#/Unity client code that consumed it.
- Developed a Hax plugin for Moodle.

Software developer

Mar 2017 – Jan 2021

INSTEAD

- Gameplay programming of the battle system of a rogue-like RPG, in Unity/C#.
- Designed and built Unity and Windows Forms tools so developers could author data for that rogue-like RPG.
- Contributed to web projects in Laravel, WordPress and NestJS, and front-end work in Bootstrap 4.
- Contributed to “09”, a casual mental-calculation mobile game built in Unity.

Game developer

Jun 2016 – Mar 2017

Digital Mania Studio — end-of-study internship

- Built a voice chat module for Unity on the C++ library RakVoice, for a social VR game on GearVR.
- Built a mathematical puzzle game for mobile in Unity3D.
- Contributed to a Pac-Man clone advergame for Facebook, in Unity.

Game developer

Apr 2016 – Jun 2016

Placeholder — internship

- Gameplay programming in Unity3D of a mobile puzzle game based on optical illusions, inspired by Monument Valley.

QUALIFICATIONS
